

**Athens City Planning Commission
Minutes of Regular Meeting
Tuesday, July 3, 2024, 12:00 p.m.**

A regular meeting of the Athens City Planning Commission was held in City Council Chambers, third floor of City Hall, on July 3, 2024.

Attendees: Russell Chamberlain, Dylan Armstrong, Terry Eiler

1. Call to Order

John Kotowski called the regular meeting of the Planning Commission to order at 12:00 p.m. and administered the oath to those in the audience intending to speak before the commission. Quorum established with five members present.

PLANNING COMMISSION MEMBERS:

Chris Knisely	Present
John Kotowski, Chair	Present
Steve Patterson, Mayor	Present
Austin Phillips, Vice-Chair	Present
Andy Stone, Service-Safety Director	Present

STAFF:

David Riggs, Code Enforcement Director	Present
Meghan Jennings, City Planner	Present

2. Disposition of Minutes

Steve Patterson moved to approve the June 25, 2024 minutes. Chris Knisely seconded. Motion passed 5:0.

3. Cases

Case #24-06 Appeal of lot split denial at 0 Lavelle Road

John Kotowski read into the record the email communications (attached Ex 2) that have been received about this case.

Commission discussion

- The applicant applied for a minor subdivision but because of the access easement Athens City Code requires it to be treated as a major subdivision, which requires Planning Commission and City Council review.
- The denial of the minor subdivision application (attached Ex 1) was due to them filing the wrong application type, so the denial redirected them to a major subdivision application.
- What the Planning Commission is looking at today is approval of the lot split only, not usage. Because this is property located outside city limits but within the 3-mile radius, the Planning Commission is consulted only about the lot split and not usage.

- The request today, and the reason it is before the Planning Commission, is to allow a variance to a major subdivision; to treat this as a minor subdivision. After the Planning Commission review, it will go to City Council.
- Andy Stone read a prepared comment (attached Ex 3) regarding land use planning. This is to clarify the role of the Planning Commission in this case. A decision about usage is outside the scope of the Planning Commission.
- If a variance is approved and this is approached as a minor subdivision, then you do not have to do all the infrastructure requirements that would be required with a major subdivision (e.g., putting a paved public road in).
- If the variance is denied by the Planning Commission and the applicant proceeds with a minor subdivision, which is the “flag lot” version (attached Map A), that does not mean that there will be five access points. He will still access via one driveway – the lots will front on the road so they will have frontage even if a driveway is never built there. It will not be an illegal subdivision. How he accesses his property will be up to him.

General Discussion

- Russell Chamberlain/applicant, agreed with what Andy Stone communicated in his summary.
- Dylan Armstrong/Lavelle Road resident, is here today to represent the Armstrong family. The family is contesting the sale of the property to Mr. Chamberlain. The family would like to preserve the green space and maintain the biodiversity on the property. A subdivision of this land will be detrimental to the biodiversity, green space, and the Lavelle Road community.

Andy Stone made a motion to approve the lot split as a variance to a major subdivision and allow it under the minor subdivision provision, with one access point and two of the three parcels without road frontage. Austin P. seconded the motion. Motion passed 4:1.

This will move forward as a recommendation to City Council for review.

4. **Communications**

None

5. **Reports from Director of Development & Code Enforcement and City Planner**

David Riggs/Code Enforcement Director

- Construction updates:
 - Beaumont Green/Della Drive: remodeling the senior apartments.
 - Lostro Building/63 S. Court Street: Starting a 2nd and 3rd floor and outer shell remodel soon.
 - Chipotle & Starbucks/East State Street: under construction. Starbuck plans still pending.

Meghan Jennings/City Planner

- Met with the Lostro Building property owners and they are interested in forming a PACE District. This will need to be in partnership with the city. Privately funded.

6. **Opportunity for Citizens to Speak**

None

7. **Announcements & Other Business**

- Next meeting July 17, 2024
- Andy Stone announced that the city is applying for "Welcome Home Ohio" funding, which is a state initiative for housing with a focus on urban infill.

8. **Adjournment**

The meeting adjourned at 12:41 p.m.

John Kotowski,
Head of the Planning Commission

John,

I am writing to express my opposition to the proposed development of land on Lavelle Road for Airbnb and other multi-unit purposes. The site in question borders family land, which includes a tree farm and conservancy area.

The area slated for development is accessed by Lavelle Road, a narrow, winding lane that already faces challenges of safety, drainage, limited utilities and overhanging trees. Additionally, this region is served by a small Le-Ax water line with limited taps and water pressure. The construction of septic systems here requires meticulous planning due to limestone caps and outcrops that are often less than six feet below the surface, significantly limiting drainage fields.

Lavelle Road is primarily home to single-family dwellings, stretching between Highway 56 and Lurig Road. Although intended for local traffic only, it is frequently used as a cut-through between SR 682 and Highway 56. The increase in traffic and strain on utilities from multiple rental units is not an appropriate use of this land, which is best preserved as wooded greenspace with single-family homes.

Thank you for considering my objections via email. I regret that I cannot be present to voice my opposition in person.

Dr. Mr. Kotowski, I reside at 8590 Lavelle Rd., and I am reaching out to voice my opposition to the proposed use of land on Lavelle Rd. for Airbnb development. My family relocated here in June of 2023, seeking a quieter life after living in Las Vegas for over 25 years. My initial experiences with Airbnb in other areas have shown me the negative impact they can have on communities, and I'm not keen on dealing with that in our new neighborhood. Lavelle Rd. is quite narrow, and the traffic is already excessive, to say the least. There's even a single-lane bridge! Constructing Airbnb or multi-unit buildings here would only exacerbate the congestion and increase the risk of accidents. With a child who will soon be driving, the current road conditions are already concerning, and more traffic would pose a significant safety hazard. We chose Lavelle Rd. for its single-family homes and spacious, private yards. Had we been aware of the potential for Airbnb or multi-unit buildings, we would have chosen a different location. I urge you to consider the safety and well-being of Lavelle residents over the financial interests of those seeking to profit from this development. I wish I had been informed earlier so I could have attended. I was just recently made aware of this development. I'm sorry I won't be able to physically oppose it, but please understand that the Lavelle community is united in our opposition to this project.

Please reach out if you have any questions!

Ericka and Gabe Spiezio

Subject: 0 Lavelle Rd Request
To: <jkkotowski@gmail.com>

Dear Members of the Athens City Planning Committee,

We are writing to support our neighbors by opposing the division of a section of land on Lavelle Rd. into 3 parcels and subsequent development into a subdivision.

Our road is narrow, curvy, includes several blind spots, and has significant drop offs on the sides of the road. Adding additional units, especially those that could include multi-family units and/or visitors unfamiliar with the road is troublesome and dangerous. We know how scary this is, as our road was used as an unofficial detour with the closing of the bridge on Union Street/Route 56 for repair a few years ago.

The stress on utilities and other infrastructure with the addition of multiple units would also be impacted with dividing what is now one parcel.

While we are not aware of the specifics of the ordinance being appealed to your committee, we wanted to voice our opposition to approval as we all learn more.

Thank you for your consideration in sticking with your original decision to deny the request for dividing and developing the parcel at 0 Lavelle Rd. We will not be able to attend the meeting in person, as we will be out of town.

Jeffrey and Angela Anderson
8959 Lavelle Rd.

John Kotowski,
Head of the Planning Commission

Mr Kotowski,

We have been on Lavelle Rd. for forty years and have seen it grow from a few houses to most lots now having homes on them. This road is serviced by a small Le-ax line that already loses pressure & is not adequate for the amount of homes. Lavelle Rd is narrow & dangerous at blindspots, residents know where to slow down & hug the right side. I have been narrowly missed many times because of people unfamiliar with the road driving in the center of the road on hills and blind spots. In the snow it is nearly impossible for two cars to pass. We also have concerns about the increase in septic systems. It seems like Athens is being overrun with apartments, rentals and AB&B's we hope this doesn't happen in our area. Thank you for taking our concerns into consideration and please express them to the Planning Commission at the meeting.

John:

As a resident of Lavelle Road, I am writing to you this evening to express my concerns regarding subdivision of lands, owned by Russel Chamberlain, near 8807 Lavelle Road. As a newer resident of Lavelle who came previously lived in Cincinnati, Columbus, and Yellow Springs Ohio - I have an interesting view on the current utility challenges facing our quaint street. When my wife and I first settled in, we didn't quite realize the interesting state of affairs regarding having Le Ax providing water service, but every address having a private waste disposal/septic system. These systems appear to be often times constrained in their placement on the properties they serve - perhaps due to the mineral / rock composition under the soil - which was made abundantly clear to me after a contractor broke an entire drilling rig attempting to create geothermal pipe wells on our property. This obviously creates a unique environmental situation on our street as property drainage naturally feeds Hocking River tributaries such as Margaret's creek. Additionally, Lavelle Road is at its best a 1.75 car roadway that is often used at excessive speeds by people connecting from 56 to 682 and students taking joy rides. The road already feels unsafe at night and early in the morning to traverse via car and feels unsafe at all hours of the day as a pedestrian just trying to get some fresh air and walk their dogs. Additionally, much of Lavelle Road did not even have hardwired broadband internet when we moved in due to over reporting by Spectrum on FCC surveys. We finally pushed Spectrum to finish build out for most/all of the remaining addresses - however it is an uphill battle as we still don't have a firm date from Frontier (formerly GTE) to replace their underground buried, decaying, and barely functional Copper POTS infrastructure. All this is to say, Lavelle is a beautiful oasis near the city but given its proximity it faces some stark limitations in water delivery, sewage treatment, road safety/drainage care, modern digital infrastructure, and frequent electrical issues that already tax AEP crews/services ability to find down lines in a timely manner.

Based on the Athens County Comprehensive plan, when adding things such as subdivisions - major or minor - some of the recommendations from the plan writers include adopting asphalt as a minimum standard for subdivision road surfaces. Additionally, the plan writers note:

"Pedestrians and bicyclists often feel unwelcome or even threatened on most streets and roadways."

This would almost certainly increase traffic on Lavelle and exacerbate the sentiment quoted from Comprehensive Plan. Additionally, while the strategic plan mentions fostering entrepreneurship within Athens County, according to the plan the entrepreneurial businesses should provide for meaningful and skill-oriented employment for Athens County residents. AirBnB and competing services, e.g. VRBO, only serve to perpetuate a gig economy and don't provide inherent employment stability or high paying job opportunities.

I believe this development would alter the current make up of Lavelle Road significantly by changing the dynamic of its current single-family housing with large wooded/conservation areas and adding in a potentially disruptive and culture changing element of a short-term rental subdivision. The utility infrastructure of Lavelle Road is already under resourced and strained. The roadways and drainage have not been modernized to meet the current level of demand, let alone *more*. Additionally, there's not likely to be an economic or entrepreneurial impact the community can realize or profit from in any meaningful way. What is possible is a disruptive building project, further strained resources, negative environmental impact from utility/road construction etc., and increased traffic and litter.

I sincerely thank you for your consideration and time reading this e-mail.

Regards,
Coreland Campbell Phillips

Subject: Multiple housing and land development on Lavelle Road

This is the same email that was sent on June 21st, they expanded the "to" list to include County Commissioners, Health Dept., and City of Athens Law Director.

Greetings,

I am writing to express my opposition to the proposed development of land on Lavelle Road for Airbnb and other multi-unit purposes. The site in question borders family land, which includes a tree farm and conservancy area.

The area slated for development is accessed by Lavelle Road, a narrow, winding lane that already faces challenges of safety, drainage, limited utilities and overhanging trees. Additionally, this region is served by a small Le-Ax water line with limited taps and water pressure. The construction of septic systems here requires meticulous planning due to limestone caps and outcrops that are often less than six feet below the surface, significantly limiting drainage fields.

I would like to add the information that the USDA Soil and Water division in the Plains, should be advised in writing of any plans to develop lands along the Margaret Creek and Factory Creek protected watersheds to the Hocking River. I suspect this would be required as part of the Health Departments approval to County septic system plans.

Lavelle Road is primarily home to single-family dwellings, stretching between Highway 56 and Lurig Road. Although intended for local traffic only, it is frequently used as a cut-through between SR 682 and Highway 56 by significantly larger non-local vehicles.. The increase in traffic and strain on utilities from multiple rental units is not an appropriate use of this land, which is best preserved as wooded greenspace with single-family homes.

Thank you for considering my objections via email.

Subject: Commentary I read at PC

While we are reading points into the record, I wrote up some additional points about both this case and the wider issue of planning and development in the greater Athens area.

First of all, it is important to reiterate the role of Athens City Planning Commission in this case, as well as what is not its role. This commission does not decide anything related to land use in the unincorporated area of the county. Outside of Athens and Nelsonville, in the other parts of Athens county, both citizenry and elected leadership have vigorously opposed any kind of zoning restrictions for the 60 or so years since zoning started in Athens in the 1960s. The unincorporated areas simply do not want the government telling us what we can do with our property, and particularly those busybodies in the City of Athens. Though ironically we are often all too ready to demand the government tell our neighbor what not to do with their property.

The Ohio Revised Code gives cities some very limited authority in the area just outside their boundaries regarding land subdivision only. The purpose of this authority is to see that any property splits will be compatible with city services should the area ever annex in the future. That is all. It is not to decide if a land use is compatible with the surround land or not, or if the current infrastructure can support it or not, or if the proposed use is a good idea or not. The applicant in this situation has provided two different lot split versions, only one of which require planning commission approval, the one with the easement to access multiple parcels. The other version with the flag lots is not a subdivision that requires commission approval. The land will be subdivided in some manner and the landowner will proceed with whatever plans he comes up with – we have to decide which version of the lot split would be less-objectional to the city if and when the area ever annexes. It may never.

This case is instructive about the benefits and perils of growth at the boundaries of cities in unincorporated areas. In our fractured system, concerns about the road should be placed with Athens Township, concerns about the water line should be placed with Leax, and concerns about sewage or septic should be placed with the health department. If citizens of an area wish the City of Athens government coordinate all those things as well as regulate land use with zoning, seeking annexation into the City of Athens is the only way to do that. Annexation is a deliberate, difficult effort, intentionally made so in state law so it is not done haphazardly, that requires consensus of a majority of those wishing to annex. These choices are things we have to think about as well plan for both Athens and the wider region in the years ahead.
